PROFESSIONAL SUMMARY

Senior Software Engineer with 10+ years of experience designing and delivering enterprise-grade backend systems, APIs, and distributed applications using Microsoft .NET stack. Currently working at a Denmark-based engineering organization, 52 Digital, collaborating directly with Danish stakeholders on enterprise leasing and financial systems. Strong expertise in backend architecture, RESTful APIs, system integration, SQL databases, CI/CD pipelines, and Docker-based deployments. Proven ability to modernize legacy systems, design scalable architectures, and lead full software delivery lifecycles in Agile environments. Experienced in building secure, maintainable, and high-performance backend systems with a strong focus on clean architecture, microservices concepts, and enterprise integration.

KEY ACHIEVEMENTS

Enterprise Leasing Portal Development

Professional Accomplishment

- Delivered full lifecycle development of enterprise Leasing Portal system integrated with Business Central ERP.

Automation & Modernization

Professional Accomplishment

- Developed automation system replacing manual financial transaction processing
- Modernized legacy banking applications with improved architecture and security.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

52 Digital

09/2024 – Present
Dhaka, Bangladesh

- Lead backend development for enterprise systems used in Danish financial operations
- Design and implement scalable APIs using .NET 10 and ASP.NET Core
- Integrate internal systems with Business Central ERP and external services
- Own full SDLC of Leasing Portal including architecture, development, deployment, and support
- Design clean architecture using SOLID principles and Repository pattern
- Implement automated unit testing (xUnit) and maintain high code quality standards
- Configure Docker-based deployments for consistent environments
- Build and maintain CI/CD pipelines using Jenkins and Bitbucket
- Collaborate with Danish stakeholders for requirements analysis and delivery
- Mentor engineers through code reviews and technical guidance
- Participate in Agile ceremonies (Scrum, sprint planning, retrospectives)

Associate Manager — Application Development

BRAC Bank PLC

10/2021 – 08/2024
Dhaka, Bangladesh

- Led design and development of enterprise banking applications and APIs
- Built backend services using .NET Core for secure financial systems
- Developed middleware for system integration and data flow management
- Optimized SQL Server and Oracle database performance
- Improved system architecture for scalability and maintainability
- Led Agile delivery cycles including sprint planning and backlog grooming
- Supported production systems, debugging and performance tuning
- Integrated third-party APIs for banking operations
- Prepared technical documentation and system flow diagrams

.NET Developer

This Is Digital Media Group

09/2021 – 10/2021
Bangkok, Thailand

- Developed REST APIs using ASP.NET Core and EF Core
- Maintained SQL Server database systems and optimized queries

- Implemented unit testing using xUnit
- Worked in distributed team environment using ClickUp and GitLab

Senior Software Engineer

Mediasoft Data Systems Ltd

05/2018 – 08/2021
Dhaka, Bangladesh

- Developed backend APIs for enterprise web applications
- Built Angular-based frontend modules for business systems
- Designed and optimized SQL Server and MySQL databases
- Integrated secure authentication and API security layers
- Worked on production support and system enhancements
- Conducted code reviews and performance improvements

Software Developer

Next IT Ltd

05/2016 – 11/2017
Dhaka, Bangladesh

- Developed AngularJS + .NET-based enterprise modules
- Built and maintained REST APIs and database integrations
- Improved UI/UX for internal business applications
- Managed source control using TFS
- Supported production systems and bug fixes

Web Developer

Nogor Solutions Ltd

09/2014 – 04/2016
Dhaka, Bangladesh

- Developed responsive web applications using HTML, CSS, JavaScript
- Built and maintained backend database queries and schemas
- Supported software testing, debugging, and documentation
- Worked on client/server application enhancements

SELECTED PROJECTS

Leasing Portal System (.NET 10)

Full lifecycle enterprise leasing platform

- Integrated with Business Central ERP
- Docker + Jenkins CI/CD deployment
- xUnit testing + clean architecture

Card Express Automation

Financial process automation

- Replaced manual financial processing with automated system
- Built middleware APIs and background processing services

Card Cheque Modernization

Legacy system modernization

- Migrated legacy system to modern architecture
- Introduced SSO and centralized user management

Workflow Management System

Task tracking and approval

- Enterprise task tracking and approval system
- Role-based dashboards and workflow automation

EDUCATION

MBA in International Business

Cardiff Metropolitan University

2013
Wales, United Kingdom

BSc (Hons) Computer Science

University of East London

2012
England, United Kingdom

GCE A-Level / O-Level

British Council

Dhaka, Bangladesh

CORE TECHNICAL SKILLS

Backend & Frameworks

- C#
- .NET
- ASP.NET Core
- ASP.NET MVC
- Web API
- .NET Framework

Architecture & Concepts

- REST APIs
- Microservices
- Clean Architecture
- SOLID
- Design Patterns
- System Integration

Databases

- SQL Server
- Oracle
- MySQL
- T-SQL
- Entity Framework
- Dapper
- ADO.NET

DevOps & Tools

- Docker
- Docker Compose
- Jenkins
- Bitbucket
- Git
- CI/CD pipelines
- IIS
